Facilities May Have Processes Subject to Different Risk Management Requirements Based on the Different Risks They Present Program 1 Processes No accidental releases resulting in offsite impacts within five years of RMP submittal No public receptors in worst-case scenario zone and Emergency response procedures coordinated with local emergency organizations Program 2 Processes Not eligible for Program 1 or subject to Program 3 Program 3 Processes Not eligible for Program 1 and Subject to OSHA process safety management standard or in NAICS code 32211, 32411, 32511, 325181, 325188, 325192, 325199, 325211, 325311, or 32532 In addition, if a facility will use its own employees to respond to releases ( for example, with a facility hazmat team ), the facility must implement a full emergency response program that includes a plan, training, and plan review and updates. The facility may choose to develop one plan following National Response Team guidance ( available at <http://www.epa.gov/ceppo> ) as described on page 19. The facility must coordinate its plan with its LEPC plan. Different Requirements for Different Kinds of Facilities Facility risk management programs will vary. The RMP regulation requires facilities to develop a program that reflects the different levels of risk and complexity that different processes pose. A process falls into one of three categories - Program 1, Program 2, or Program 3 - based on accident history, worst-case scenario results, and industrial sector. In general, Program 1 processes are less complex, pose less risk to the public,...
