CONTENT Documents AUTHOR (S) Accounts Exercises Configuration Feedback Reports Instruction DATA SYSTEM ADMINISTRATOR Reading Tutor LSB Database DATABASE Basic STUDENTS Connectivity Testing Status Figure 2. LSB System Architecture Data. The data portion of the program provides the basic connectivity to the content dent data that resides in the database. An Application Programming Interface (API) was and stu used to develop the PHP Hypertext Preprocessor (PHP; <http://www.php.net>) scripting language that makes communicating with MySQL (<http://www.mysql.com>) based databases very easy. MySQL based databases are relational database systems that store data in the form of related tables. This type of relational database system was needed to ensure the flexibility needed for the LSB. The database schema was designed using upfront requirements analysis and then fine-tuned via an iterative process during development. Student. The student portion of the program is a large set of dynamically generated ges that are controlled by the program. These are the pages with which the student web pa interacts. The responses of the student govern the generation of the next page. Administration. The administration portion of the program presents the local strator with options for adding students and generating reports. The administrator admini also adds program specific bridge content, controls the number of questions a student must answer for each concept, as well as which concepts, topics,...
