

# Chemistry in Its Application to Agriculture and Physiology

Filesize: 6 MB

## ***Reviews***

*This publication is definitely not simple to begin on studying but quite fun to see. It really is full of knowledge and wisdom I am just effortlessly can get a satisfaction of studying a created pdf.*  
*(Alfreda Bradtke)*

## CHEMISTRY IN ITS APPLICATION TO AGRICULTURE AND PHYSIOLOGY

TheClassics.us. Paperback. Book Condition: New. This item is printed on demand. Paperback. 140 pages. Dimensions: 9.7in. x 7.4in. x 0.3in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1842 edition. Excerpt: . . . unites with it. By this is meant, that the quantities in both cases must either be equal or multiples of each other; for the doctrine of equivalents denies the possibility of their uniting in fractional parts. This will be rendered obvious by a consideration of the two following examples: 100 parts of Cyanic Acid contain 23-26 oxygen 1. 100 parts of Cyanic Acid saturate 13721 parts of potash, which contain 23 26 oxygen 1. 100 parts of Nitric Acid contain 73-85 oxygen 5. 100 parts of Nitric Acid saturate 214-40 parts of oxide of silver, which contain 1477 oxygen 1. In the first of these cases, the relation of the oxygen of the base to that of the acid is as 1: 1; in the second, as 1: 5. The capacity for saturation of each acid is, therefore, the constant quantity of oxygen necessary to neutralize 100 parts of it. Many of the inorganic constituents vary according to the soil in which the plants grow, but a certain number of them are indispensable to their development. All substances in solution in a soil are absorbed by the roots of plants, exactly as a sponge imbibes a liquid, and all that it contains, without selection. The substances thus conveyed to plants are retained in greater or less quantity, or are entirely separated when not suited for assimilation. Phosphate of magnesia in combination with ammonia is an invariable constituent of the seeds of all kinds of...
