RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 26 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1985-01-01 edition. Excerpt: . . . areas, projects located in the sample Primary Sampling Units³ in HSS are selected with certainty. Prior to sample selection all permit projects having the same sampling rate are grouped together, and within each group the projects are sorted by type of construction and within type of construction the projects are arranged by permit value in The place weight is the reciprocal of the probability of selecting a permit-issuing place in the HSS. Since places are selected from sample PSUs, the place weight includes the reciprocal of the PSU sampling rate. Primary Sampling Unit (PSU) is a county or a group of counties. FARM NONRESIDENTIAL CONSTRUCTION Value-in-place estimates for new farm nonresidential construction are extrapolated from the annual U. S. Department of Agriculture (USDA) report. Income and Balance Sheet Statistics. Monthly or quarterly estimates are not available. To estimate monthly values, including projections for the current and following year, the USDA data are smoothed over the year with the trend of the seasonal factors computed for all other private construction. PUBLIC UTILITIES Value-in-place estimates for telephone and telegraph construction are based on reports to the Census Bureau of actual monthly construction progress. For electric light and power, gas, railroad, and petroleum pipeline categories, construction put-in-place estimates are based on annual capital expenditure reports compiled by Federal regulatory agencies and cooperating private organizations. Pending availability of annual data, monthly estimates for gas and electric utilities and railroads are obtained by distributing Bureau of Economic Analysis (BEA)...
