Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Laboratory Manual of Physical Chemistry In presenting this manual of laboratory exercises in physical chemistry, the authors have been prompted by a threefold object: first, to facilitate the task of the instructor in handling large classes of students beginning a course of practical physical chemistry; second, to assist the student in recording his observations in a clear and comprehensive manner; and third, to present such quantitative exercises as will be particularly desirable in the training of students of engineering. In view of the fact that there are, as a rule, available for laboratory work not more than two and one-half hours at a time, it has been found desirable to have the different pieces of apparatus set up beforehand by the instructor. To this end, each experiment is preceded by an exact list of the apparatus and chemicals needed. It is believed that this will materially aid the instructor in assembling the necessary equipment. At the Rensselaer Polytechnic Institute, the laboratory course immediately follows the completion of the theoretical course in physical chemistry, and students are thus prepared to take up the study of any experiment herein listed. It is therefore found practical to prepare the equipment for one or two units of each exercise before the laboratory course starts, and to shift the student successively from one experiment to another. In this way, an excessive amount of preparatory work is avoided. Many of the experiments have been in use in their present form at this Institute, and elsewhere, for a number of years, and have been found to be thoroughly satisfactory. Directions have been made as concise as possible. About the Publisher Forgotten Books...
