

Neurothrombectomy Devices for Treatment of Acute Ischemic Stroke: Technical Brief Number 4

Filesize: 2.89 MB

Reviews

This publication will be worth purchasing. It really is written in simple terms instead of difficult to understand. It has been designed in an exceptionally simple way and is particularly only right after I finished reading this ebook in which basically modified me, alter the way I believe.

(Prof. Loyce Runolfsson Jr.)

CreateSpace Independent Publishing Platform. Paperback. Book Condition: New. This item is printed on demand. Paperback. 102 pages. Dimensions: 11.0in. x 8.5in. x 0.2in. Stroke is the third leading cause of death following diseases of the heart and cancer. A majority of strokes are classified as ischemic in nature (87), with intracerebral hemorrhagic (10 percent) and subarachnoid hemorrhagic stroke (3) accounting for the rest. Every year in the U. S. , approximately 795, 000 people develop a new or recurrent stroke, with 610, 000 first attacks and 185, 000 recurrent attacks. The annual rate of strokes is expected to increase to 1. 2 million cases by the year 2025, a troubling trend that underlines the urgency of adequate ischemic stroke treatment. Stroke occurs more commonly in females than males, especially at older ages. Blacks have a two-fold higher risk of first-ever stroke than Caucasians, with age-adjusted incidences of 6. 6 per 1000 in black men as compared with 3. 6 per 1000 in Caucasian men. In 2006, 43. 6 deaths occurred due to stroke per 100, 000 people in the U. S. , averaging out to one death due to stroke every 3 to 4 minutes. In 2005, the overall mortality rate from stroke was approximately 44. 7 per 100, 000 for Caucasian males, 70. 5 per 100, 000 for black males, 44. 0 per 100, 000 for Caucasian females, and 60. 7 per 100, 000 for black females. Lower mortality rates were seen in Hispanic, Asian, and American Indian populations as compared with Caucasian populations. Stroke is the leading cause of long-term disability in the U. S. Thirty percent of stroke survivors require outpatient rehabilitation services and 15 to 30 of patients remain permanently disabled. Significant decreases in health-related quality-of-life are also seen following a stroke. Studies have shown that at-risk...
