The practices mentioned are doubtless highly objectionable. But in the first case the generic characters may be regarded as included in the specific diagnosis, and in the second the specific characters may be considered as expressed in the generic description; in either instance a doubt might reasonably exist as to which of all the characters of a new organism were to be regarded as generic, and which as appertaining to the species. This differs from the cases in which a generic name withoiit a diagnosis is placed before the names of a number of species then or previously described. In these instances, if there are characters warranting the allocation of species, and separating them from other genera, it is the duty of the proponnder of the genus to indicate them to the best of his ability. If too ignorant or too...
