

Rethinking the Way We Teach Science: The Interplay of Content, Pedagogy, and the Nature of Science

By Louis Rosenblatt

Taylor Francis Ltd, United Kingdom, 2010. Paperback. Book Condition: New. 226 x 150 mm. Language: English . Brand New Book. Offering a fresh take on inquiry, this book draws on current research and theory in science education, literacy, and educational psychology, as well as the history and philosophy of science, to make its case for transforming the way science is taught. Re-thinking the Way We Teach Science addresses major themes in national reform documents and movements--how to place students at the center of what happens in the classroom; how to shift the focus from giving answers to building arguments; how to move beyond narrow disciplinary boundaries to integrated explorations of ideas and issues that connect directly with students; and most especially, the importance of engaging students in discussions of an interactive and explanatory character. Deeply anchored in the classroom, highly interactive, and relevant across grade levels and subject matter, above all this is a book about choosing to place the authority of reason over that of right answers.

Reviews

This pdf may be worth purchasing. This is for anyone who statte there was not a really worth reading. I found out this pdf from my i and dad encouraged this pdf to understand.

-- **Mrs. Annamae Raynor**

If you need to adding benefit, a must buy book. This really is for all who statte that there had not been a well worth reading. It is extremely difficult to leave it before concluding, once you begin to read the book.
