CHARACTERIZATION OF MURINE BONE MARROW MESENCHYMAL STEM CELLS

Book Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Self Renewal, Differentiation and Tumorigenic Potential | The use of adult stem cells for applications such as tissue engineering and gene therapy is one of the major promises of regenerative medicine. In the field of adult stem cells, bone marrow stromal mesenchymal cells (BMSCs) are very promising candidates. The ability to move forward the use of these cells in therapy depends on the setting up of mammalian models, necessary to evaluate...
