Excerpt from Power, Heating and Ventilation Combined Power and Heating Plants, Vol. 3: A Treatise for Designing and Constructing Engineers, Architects and Students The subjects covered in the following chapters relate especially to the power and heating equipment for buildings of large size, such as office buildings, department stores, municipal buildings, hotels, hospitals and institutions, theatres, technical and trade schools, loft buildings, railroad stations, machine shops, foundries, paper and textile mills. The mechanical equipment in buildings of this kind is more or less complex, depending upon their size and use, and may provide for the generation of power, lighting, elevator service, refrigeration, pumping, fire protection, air compression, vacuum cleaning, drying, water heating, cooking, sterilizing, etc., not to mention the special machinery used in various manufacturing processes. In some cases only a few of these requirements may be necessary, while in others, like the modern office building or hotel, practically all of those noted are called for. It has been the aim in the present volume to treat the various problems somewhat broadly and with special reference to...
